Universal Power  
Procedures Table

Ritter®  
by MIDMARK

# A power procedures table is a wise investment for your practice.

There are many challenges facing you and your practice today, so choosing the right equipment is more important than ever.

More and more healthcare providers are investing in power tables when updating or constructing new facilities. This new trend is making exam and procedure rooms more efficient and safe, giving the patient a better overall healthcare experience.

Make the smart choice. Choose the Ritter 230 Power Procedures Table and experience the many benefits of a power table.

# 230 Universal Pro

## **The Right Thing to Do...For Your Practice, Your Staff and Your Patients**

As the practice of medicine changes, more procedures are being performed in the office than ever before, making efficiency essential.

Positioning patients can be a difficult task when dealing with less mobile, elderly and special needs patients. The Ritter 230, with its low height and multi-positioning capabilities, improves office efficiency by allowing you and your staff to easily position patients with the touch of a button; reducing the likelihood of fatigue, back and neck strain, and workplace injury.

Patients will feel more comfortable and secure when they can easily get onto a table and experience smooth and steady movement during positioning. Their anxiety will be reduced, and they will feel satisfied with the level of healthcare you provide.

Consider the Ritter 230 Power Procedures Table a long-term investment for your practice, your staff and your patients!

*The Ritter 230 with power height, back, foot and tilt allows you to effortlessly and precisely position patients for a multitude of procedures.*

# Procedures Table

*Ergonomic and  
intuitive standard  
hand control in  
easy-to-find location.*

## Options that improve efficiency

### **Rotation**

*Exam and procedure rooms are being equipped with more and larger devices. Inefficiency results when moving these devices to the patient. Outfitting your procedures table with the rotation option simplifies this task by allowing you to move the patient instead of the device.*

*The simple touch of a pedal (highlighted in photo) on either side of table permits 350 degrees of rotation; touch the pedal again to lock table in place. It's that easy!*

### **Flat Upholstery**

*A 24-inch wide and flat upholstery option offers greater accessibility to the patient. The seamless design ensures a great look and easy-to-clean surface.*

### **Electrical Outlets**

*Optional hospital grade outlets (on each side) allow easy access to electrical power, providing a clean look to the room and floor space free of power cords.*

## *Accessories that add versatility*

### **Restraint Straps**

*Provides secure restraint for patients who may be sedated.*

### **Linear-Style Foot Control**

*Optional foot control accessory maintains sterile field and can be used in combination with hand control. Select your style... traditional linear style or more efficient disc style (linear shown).*

### **Adjustable Arm System**

*Offers patients a stable platform in accessing the table and sense of security during positioning. Arms rotate and lock into one of three possible positions and are removable...all without the use of tools.*

### **Articulating Armboard**

*Comfortably supports patient's arm. Ball joint design permits multi-directional movement.*

### **Double Arm Instrument Tray**

*Provides a convenient surface to place your instruments or supplies during procedures and gives a wide range of motion for easy reach, no matter where you are standing.*

### **Hand Surgery Armboard**

*Supports patient's arm. The telescoping pole rests on the floor to provide extra stability for delicate hand surgery procedures.*

### **Locking Casters**

*Provides mobility without sacrificing valuable floor space.*

### **24" Wide Foot Rest**

*Provides extra width for added support under the patient's feet.*

### **Articulating Knee Crutch**

*A more ergonomic and comfortable option compared to the standard stirrups, especially for lengthier procedures.*

## *The Ritter 230 satisfies your positioning needs...*

### ***Knee-Chest***

*Tool-less reconfigure of the foot support provides the perfect position for colon and rectal exams and procedures.*

### ***Lithotomy***

*Extending the stirrups and treatment pan, lowering the foot support and tilting the seat provide the perfect position for OB/GYN exams and procedures.*

### ***Flat***

*The table supports exams and procedures requiring supine, prone, left lateral or right lateral positioning.*

### ***Low Entry***

*With the increasing number of elderly and disabled patients, the low entry position makes it easy and safe for the patient to get on and off the table.*

### ***Trendelenburg***

*Whether better positioning for the patient, treating for shock or faintness, or increasing anesthesia onset, the Trendelenburg position offers a full 30° of tilt.*

The Ritter 230 is a power procedures table with basic features, making it very affordable. Better yet, the Ritter brand has provided quality to healthcare professionals for over 50 years and is recognized as an industry leader.
